

<p>1</p> <p> Make sure your capture device is connected to computer. Then, launch Producer by clicking 'Launch Producer for Live Stream.'</p>	
<p>2</p> <p> If prompted, click Open PlayON! Producer.</p>	
<p>3</p> <p> If you have a Startech or Elgato capture device, select the correct one under Capture Device Settings.</p>	
<p>4</p> <p> If you have a different capture device, select device in Video Device dropdown menu.</p>	

<p>5</p> <p>Click Video Settings for additional video settings for your capture device. This may not be available for every device.</p>	
<p>6</p> <p>Select Resolution of the broadcast.</p>	
<p>7</p> <p>Click Overlay.</p>	
<p>8</p> <p>Select a sport for sport-specific scoring overlay.</p>	

<p>9</p>  <p>Click Continue to launch Producer for broadcast.</p>	 <p>The screenshot shows a software window with a dark background. At the top, there are two tabs: 'Video Settings' and 'Network Speed Probing'. Below the tabs, there are two buttons: a green 'Continue' button and a grey 'Cancel' button. The 'Continue' button is highlighted with a red rectangular box. Below the buttons, there is a line of text: 'NFHS NETWORK :: Producer : Version <6.6.6682.39297> : Installer <2018...>'. Below that, the word 'Team' is partially visible, and further down, the text 'and start streaming your event' is visible.</p>
<p>10</p>  <p>That's it. You're done.</p>	 <p>The screenshot shows a dark grey background with a large red rectangular box in the center.</p>
